

Thanapat Aupprathumwipanon

Software Engineer · Full-Stack Developer

Bangkok, Thailand | Tel: +66 99-009-0809 | Email: thanapat.aupp@gmail.com
Github: github.com/miramslp | Website: personal-website-miramslp.vercel.app

Computer Engineering student at Chulalongkorn University building production full-stack systems in React, NestJS and TypeScript that are used by thousands of real users. Comfortable across the stack — from clean-architecture APIs and CI/CD pipelines to data migration, third-party integrations and deployment.

Education

Bachelor of Engineering in Computer Engineering, Chulalongkorn University

Expected May 2027 (GPA 3.52)

Experience

Software Engineer Intern — Skooldio

Jun – Jul 2026

Wise Mentoring Ship — cross-university mentorship platform · React, NestJS, TypeScript

- Delivered end-to-end features for a platform now serving **1,000+ mentors and mentees** across universities: registration flow, mentee-request and mentor-handling logic, dashboard, homepage, paginated explore pages, and the admin back-office flow.
- Authored a data-migration plan and scripts to move existing records safely into the new schema.
- Built base design tokens and reusable components, and applied clean-architecture / clean-code practices (DTOs, Entities, Use Cases) with Swagger API docs.
- Set up the CI/CD pipeline and integrated LINE (Official Account, Flex messages, Developer APIs), using GCP Cloud Tasks for scheduled and async notifications; co-developed features alongside the engineering manager.

Frontend Developer — ISD, Chulalongkorn University

2026

Student-organization registration platforms — First Date & RubpuenKaomai 2026 · React

- Built the registration flow, landing page, and edit-profile UI, and handled API integration for freshman-welcome events used by **5,000+ students**, sustaining peak sign-up traffic on opening day.

Projects

Agaya

A full-stack middleman e-commerce platform connecting vendors and customers end to end. · Full-stack · Stripe · Cloudinary

- Acted as Team Lead — coordinated Agile sprints, managed full-stack development tasks, and oversaw end-to-end delivery of the platform.
- Integrated secure payment processing with the Stripe API and implemented Cloudinary for efficient product-image storage and delivery.

Stock Watcher Dashboard

A real-time stock-alert tool that automates market tracking with push notifications to user groups. · LINE Messaging API · LINE Login

- Built an automated tracking dashboard that pushes real-time stock alerts to user groups via the LINE Messaging API, removing the need for continuous manual market monitoring.
- Implemented LINE Login to provide a secure authentication experience for users.
- Used daily by a private group of friends and family to track their own portfolios, replacing manual price checking with automated alerts.

Skills

Languages	TypeScript, JavaScript, Python, C++
Frontend	React, Tailwind CSS
Backend	Node.js, NestJS, FastAPI, Socket.IO, Redis, Swagger
Data / DevOps	PostgreSQL, AWS, GCP, Docker, GitHub Actions (CI/CD)
Integrations	LINE Messaging / Flex / OA, Stripe, Cloudinary
